FOR IMMEDIATE RELEASE

## COVID-19 Test Kit Supply Exhausted at Prince George's Libraries

***Please temporarily refrain from publishing statements that the Library is currently offering test kits. This is creating significant confusion for customers while no kits are available.***

**Largo, Md.** – The Prince George's County Memorial Library System's supply of COVID-19 rapid antigen self-test kits has been exhausted. The Library is resupplied on a biweekly basis by the Maryland Department of Health and Prince George's County Health Department (subject to change). The next resupply will not be available for customers to pick up until Wednesday, January 5, 2022 at the earliest (pending final confirmation). An announcement will be issued via [pgcmls.info](http://pgcmls.info) and @PGCMLS on Facebook, Twitter, and Instagram when additional test kits become available. Customers should call (240) 455-5451 or email [askalibrarian@pgcmls.info](mailto:askalibrarian@pgcmls.info) with questions.

Library staff are maintaining a COVID-19 Testing Resources guide that can help individuals source PCR and rapid antigen testing from various local and online providers. Visit [pgcmls.info/coronavirus](http://pgcmls.info/coronavirus) for more information. PGCMLS has distributed 8,208 test kits (representing 16,416 individual tests) since November 24. Given high customer demand, tests are typically being claimed on the same day that they become available at branches (within 2-8 hours).

The Library's remaining [COVID-19 vaccine clinics](#) are listed below. First, second, or booster doses are available at each clinic. Appointments are not required. The supply of vaccines is limited and available on a first-come, first-served basis. Vaccines for children are going quickly at the Library's clinics and may not be available if you arrive toward the end of the scheduled clinic time.
